

BUTTBOARD™

Drywall Backer for Flat Butt Joints

ELIMINATES BUTT JOINT BULGES Results in flat walls and ceilings

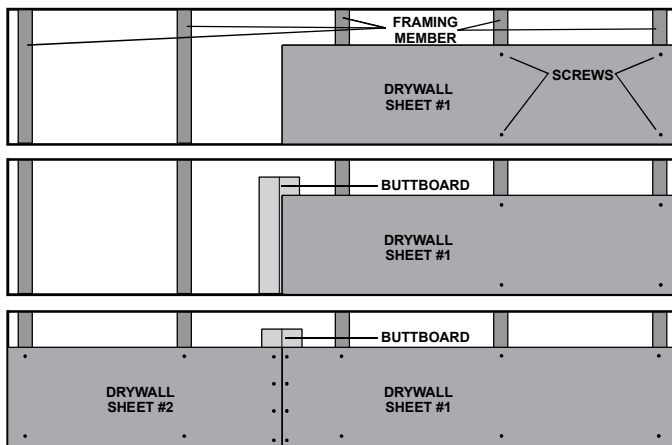

SAVES TIME AND MATERIAL HANGING

- Easier layout with butt joints between wall and ceiling framing members
- Applicable for 12" - 16" - 24" o.c., metal or wood framing members
- Requires no special tools or fasteners
- Use with any thickness drywall
- Ready to install lengths of 48" and 54"
- Facilitates usage of shorter drywall sheets
- Low Cost
- Made from OSB

FINISHES

- Finishes like factory edge
- Requires approximately half the mud, sanding and finishing labor of standard butt joint.
- Flat butt joints reduce finish carpentry labor costs and greatly improve quality

GREAT FOR REMODELING AND REPAIR

STOCK #	DESCRIPTION	LENGTH	PCS/ SKID
825S	BUTTBOARD	48"	500
826S	BUTTBOARD	54"	500

Loose pieces in a skid.

INSTALLATION INSTRUCTIONS

1. Install first sheet of drywall with butt end centered between framing members. Install screws in surround of drywall sheet, except for framing members closest to butt end.
2. Center BUTTBOARD™ on backside of drywall butt joint with machined groove facing the backside of drywall. Install screws every 8-12 inches, one inch back from drywall butt edge.
3. Butt end of second drywall sheet to end of first sheet. (Do not compress butt joint). Install screws into surround of drywall sheet except for framing member closest to butt joint.
4. Firmly push butt end of second sheet into BUTTBOARD™ and install screws every 8-12", one inch back from butt edge.
5. Finish screwing both sheets of drywall to framing members.
6. Screws can also be installed through adjoining drywall sheet into overlapping BUTTBOARD™
7. Tape and mud the butt joint. To improve the strength and workability of your drywall compound, we recommend you use Trim-Tex Mud-Max, stock # 850.

STOCK #	DESCRIPTION	LENGTH	PCS/ BOX
