

Rigid Closed Angle Corner Bead Submittal Sheet

STOCK NO.	LENGTH	PCS. PER BOX
CA08R	8'	50
CA09R	9'	50
CA10R	10'	50

Description: Rigid Closed Angle Corner Bead's sharp nose, mud-saving hole pattern and 81-degree angle give drywallers the ability to easily transform warped and twisted framing into perfectly straight corners. This also makes it the perfect solution to transition from using metal corner bead to the superior vinyl materials, as its high level of rigidity means the bead behaves more like a metal bead without sacrificing durability or longevity.

Advantages: Made from rust proof, dent resistant PVC to reduce jobsite and handling damage. Does not contain cellulose, a potential food source for mold.

Limitations: Product is designed for interior use.

Applicable Standards: Rigid PVC products made by Trim-Tex achieve a Class A rating for flame spread and smoke developed when tested under ASTM E84.

Surface Characteristics: Trim-Tex products are made from PVC. PVC does not support combustion and is self-extinguishing when the source of flame or heat is removed.

Installation: Trim-Tex recommends following established acceptable industry standard installation methods. Detailed installation instructions can be found at www.trim-tex.com.

Finishing: Always use a high quality paint.

Accessories: 847 Spray Adhesive and Safety Products distributed by Trim-Tex.
